Regarding substances on the REACH Candidate List (SVHC) Dormer Pramet

Dear customer,

Protecting people and the environment from exposure to harmful substances is an important issue for Dormer Pramet, and we assure you that we take this matter seriously. As part of our work in this area, we keep up to date with all changes to the REACH Candidate list and we ask our suppliers to do the same.

We can guarantee that hardmetal (cemented carbide) and steel products such as inserts, tools, rods etc, manufactured by Dormer Pramet do not contain any substances listed on the REACH candidate list, as updated 26 June 2020.

For Vending machines, there is still a question mark around the potential content of lead, as we have not yet received all the information from our suppliers. We are working on this and will update our customer information as soon as we have received the necessary documents.

There is no indication from any of our suppliers that products being sold through Dormer Pramet contain any other SVHC substances. Should, through our continued investigation, any conflicting information appear which concerns products that you buy from us, you will be informed through your regular business contacts.

Kind regards,

Ondrej Balabuch

Global QEHS and Sustainability Manager
Dormer Pramet
