

**NEW**

The first choice and most versatile grade for turning stainless steel.

### Benefits

- Higher cutting speeds
- Longer tool life
- More versatile than the T7335 grade
- Operational reliability
- Suitability for interrupted cuts

### Coating

MT-CVD Technology

### Substrate

Functionally gradient material

The T7325 grade is available on both positive and negative inserts with chip-breakers suited for machining M and S-group materials in roughing through finishing operations.

## T7325
